Use any design

DRAG-N-DROP the resources on the layout

Use any database

Print to any printer

From anywhere around the world

PRINTSHOP MAIL SUITE

WHAT IS VDP?

VDP stands for **Variable Data Printing**.

It is a printing process in which **elements** such as images and text **change** from one printed piece to the next, **using information from a database**.

WHAT IS IT USED FOR?

In its simplest form, **mail merge** constitutes VDP. But, the true potential of VDP lies in the **personalization of promotional documents**.

WHY DO IT?

Because VDP is proven to:

- Increase response rates
- Increase order value
- Increase revenues
- Decrease response time

WHY PRINTSHOP MAIL SUITE?

Because it will allow you to **master VDP** without the hassle!
You can't go wrong; PrintShop Mail Suite has been **the leading VDP software for over 15 years**.

- Learn how to use it quickly with a very user-friendly interface and dynamic online training tools
- Create VDP print jobs in minutes with extensive drag-and-drop functionalities
- Cut down on production time with short set-up time and speedy print stream creation
- Print high-volume mail merge fast with output optimization
- Save on postage with an extensive barcode library
- Comes with OL Care, an extensive maintenance plan including online training, updates, upgrades and technical support
